SETTING NEW STANDARDS

It is for the first time that we are associating with ITP Media Group's Construction Week. The 9th Anniversary issue, I am happy to say, will be a collector's delight. We are happy to associate with Construction Week India only because it has a global footprint.

We can well understand and sync with such brands as we too operate in a similar space. KK Holding operates in several countries in Asia region (Hong Kong, Thailand, Indonesia, Sri Lanka, Africa and India), and we are not resting on our laurels. There is always a sense of eagerness to keep looking to expand and find more and bigger opportunities elsewhere.

As CMD of KK Holding, I have cultivated the team who work hard to form an enviable reputation for its quality service. Experts often refer to KK systems as "sharp and clean with pleasing structural features". This is evident with KK Holding receiving accolades from the International Standard requirements for weather performance and structural integrity.

Over the years we have been associated with remarkable projects that have given us an edge in the market. Importantly, we have made sure that we stick to sustainable policies and that has catapulted us in the top league. We have implemented projects in Thailand, Indonesia, Sri Lanka, Maldives & India. Our works have included glass facade point fixing cable net system, glazed aluminium unitised system (LEED Platinum), segmented and curved glazing, semi unitised, skylight, aluminium composite perforated panel, SS cladding and frame-less glass system.

But we let our work and client speak for us.

Meanwhile, we hope that reading this issue will give you a pleasure as much as we are happy to be associated with it.

HOLDING

A Global Foothold

KK Holding is a multi-industry company that has more than 10 years of experience and has a wide range of expertise in commercial façade construction, hospitality, real estate, education and social sector and packed food.

The organisation now operates its business in seven regions (namely: Hong Kong, Thailand, Indonesia, Sri Lanka, East Africa and India), while always looking to expand and find other opportunities elsewhere.

Under the active leadership of Kapil Shukla, CMD, KK Group, KK Holding has managed to gain an enviable reputation for its quality services. This is evident with KK Holding receiving accolades from the International Standard requirements for Weather Performance and Structural Integrity.

KK Holding is focused on sustainable job creation. The way Kapil puts it: “Our mission at KK Holding is to create employment in rural and urban areas by operating in different industries to cater to everyone.”

As far as their projects are concerned, they undertake major projects in all areas of exterior finishes worldwide. They provide complete solution of building façade and work from the pre-planning stage to project completion.

In fact, they have focused on design, fabrication and production of curtain walls. Their companies have actively spread the concept of ‘green designs’. They believe that one must pay more attention to the visual effects of the building, while giving prominence to various practical functions such as environmental protection, energy conservation, noise insulation, earthquake prevention and living conditions.

Design continues to be the driving factor for them; therefore, they have established a standard developer-oriented design system. The company has a dedicated, professional and experienced design team with researchers and designers from across the globe. Based on the above, they have successfully achieved the integration of localisation and internationalisation for design.
